

## NEWS UPDATE FOR PROFESSIONALS

### PERGO LIVING EXPRESSION AQUASAFE WATER RESISTANT FLOORS!

Van Dyck's sensational offering Pergo Living Expression AquaSafe is nothing short of a revolution. AquaSafe is designed to look great and excel in performance. The new AquaSafe technology ensures the floors are water-resistant, making them ideal for kitchens, bathrooms and other wet areas, and by doing so it can compete head-on with Luxury Vinyl Tiles and Planks.

The authentic, true-to-nature surface is made possible by a technique that can reproduce deep grooves of wood to perfection. The unique surface texture with deeper structures provides an exceptional, natural feel. The authentic designs are also supported by a new matt surface, and decors that go all the way into the bevels. In addition, a water repellent coating on the plank edges ensures that water cannot penetrate the floor.

Pergo Living Expression AquaSafe also carries the patented TitanX surface protection: a unique multilayer technology that provides superior impact resistance and protection against wear and scratch.

Pergo Living Expression AquaSafe can be laid on Van Dyck's 2.5mm Eco-Lay underlay. This high quality recycled rubber underlay offers excellent sound absorption, improved acoustics and underfoot comfort. Eco-Lay is locally manufactured at our ISO 9001 & 14001 accredited factory in Durban.
